

PROFESSIONAL NURSE CALL SYSTEM

SUMMARY

Shenzhen XINDELIANG Electronics has been the top manufacturer of Nurse Call systems in China for 30 years. We offer a wide range of products and bespoke solutions, designed specifically to meet the needs of care homes, care groups, and hospitals in both the private and public sectors.

Established in 1987, Deliang Electronics has been leading the way in Nurse Call technology.

R&D INNOVATION

Deliang works closely with Hospital Trusts to ensure its technology continues to meet the current and anticipated needs of our clients, as well as adhering to the latest relative government guidelines.

Our research and development methods include Trust user group workshop meetings for feedback.

30YEARS

Dedicated to the development and production of a health care call system since 1987.

Expect More From Traditional Nurse Call Systems

IP300 --- Redefining Hospital Communications

Graphical touch screen Terminals

- Easy to access information from Nurse Call, EMR and other IT systems
- Deploying visual information on-screen to drive nurse efficiency
- Systems are easy to use and manage to ensure quick updates for nurses to reference

- IP300 is available as a wired and wireless system
- Full duplex voice signal and quality
- Patient has access to a two button handset to easily make and cancel calls
- An LED light indicates which room/bed needs assistance
- Calling information is displayed on all related terminals: at the nurses' station, in the corridor and at the patient's bed.

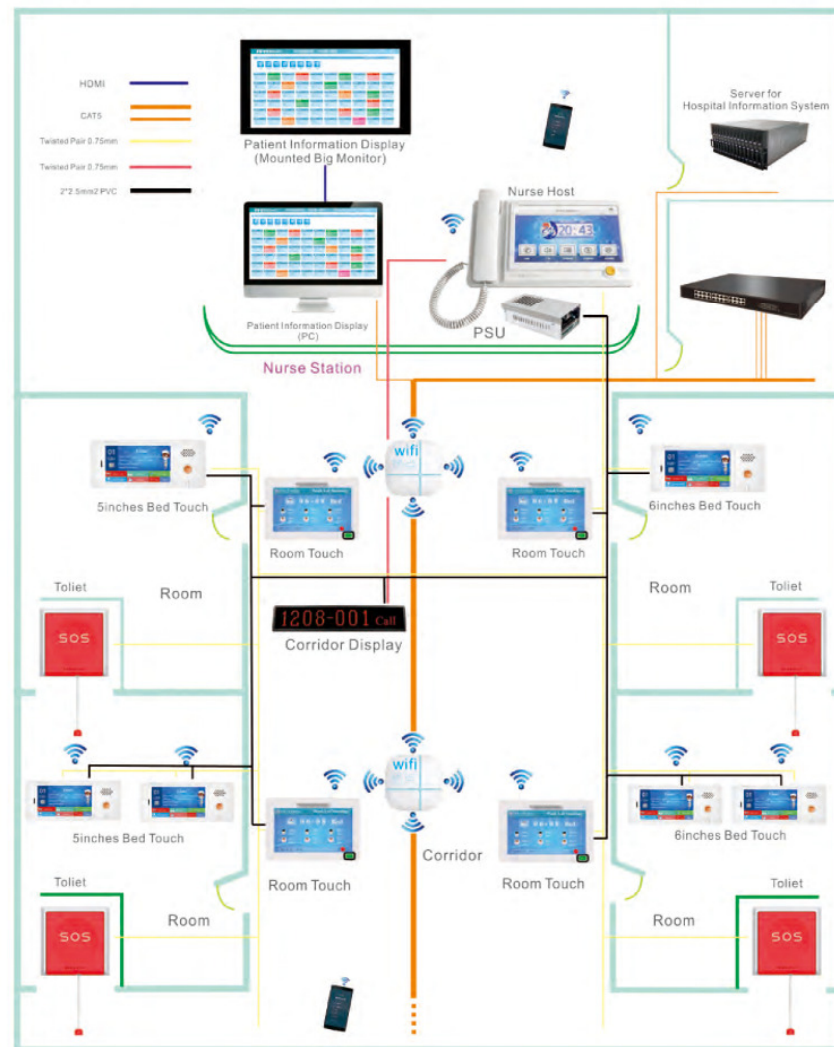

Corridor Text Display

P/N: DL-XP

- Corridor display, aluminium alloy frame
- Displays synced calling information from the host system
- Displays time or custom information between calls
- Switches between multiple calls in patient priority order (ICU, General Ward etc)
- Double-sided display
